Conjunctions are words that join **words**, **phrases** and **clauses** together. There are three types of conjunctions: **Coordinating Conjunctions**; **Correlative Conjunctions**; and **Subordinating Conjunctions**.

Coordinating Conjunctions

Coordinating conjunctions join **words**, **phrases**, or **clauses**, and are words such as: **and**, **but**, **for**, **nor**, **or**, **so**, and **yet**.

Correlative Conjunctions

Correlative conjunctions come in the form of **pairs of words**: **either ... or**; **neither ... nor**; **both ... and**; **not only ... but also**, and **whether ... or**.

For example: You can have **either** this one **or** that one.

Subordinating Conjunctions

Subordinating conjunctions are used to join a **dependent clause** — that is a clause that cannot stand alone — to one that can, an **independent clause**.

For example: The whole project will fail **unless** we put in more money.

Join these sentences using and, or, but, and remove any unnecessary words.
